

Iowa Board of Regents PSEO Census Dashboards

The Iowa Board of Regents utilizes PSEO Census data to power two dashboards on its website.

The first dashboard, [Wages and Outcomes](#), provides a concise, one-page summary of PSEO earnings and employment flow data for Iowa's three public universities. It displays information on graduate wages, geographic distribution, and employment industries, customizable at the 2-digit CIP code level.

The second dashboard, [Recent Alumni Career Outcome: Income & Student Debt by Program](#), was developed in response to [Iowa House File 135](#) which mandated the creation of a dashboard showing earnings, student loan debt, and graduate school attendance rates for recent bachelor's degree recipients. This dashboard presents data at the 4-digit CIP code level and integrates information from PSEO, the College Scorecard, and the National Student Clearinghouse.

In addition to being publicly available, each Iowa Regent university is required to distribute links to this dashboard to all new students annually. The goal is to help current and prospective students make informed decisions about their choice of major.
